

Bethel Public Library
Printing & Photocopying Fees

For more than ten years the Library has maintained the same fee structure for all printing and copying services. These fees were previously established by the company that the Library contracted with to provide these services. In 2019, when we terminated our agreement with Metro Imagining, the decision was made to continue with the fee structure. This past year we did an assessment of our services and upgraded our equipment. At this time the Library is proposing to change its fee structure to appropriately reflect the cost of ink, paper, and maintenance.

This new fee structure will start Monday, August 1, 2022

	Current Fees	Proposed Fees
B&W Photocopies	\$.15	\$.20
B&W Prints	\$.20	\$.20
Color Photocopies	\$.60	\$.50
Color Prints	NA	\$.50

This will make our prices standard across the various devices and lower the cost of color copies for our patrons; hopefully making our color copy service more desirable to the public. Prior to the new equipment we did not have color photocopying capabilities.
